SUMMARY

Full-stack engineer (MERN + TypeScript) with production experience across Node.js, Express.js, React.js, MongoDB, PostgreSQL, and Prisma. Experienced in REST API design, JWT/RBAC auth, real-time notifications, and end-to-end feature delivery. Strong in DSA (450+ LeetCode). Seeking a Backend, Full-Stack, or Software Developer role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Middleware, Socket.io, Microservices Architecture

Frontend: React.js, Tailwind CSS, Bootstrap, Axios

Databases & ORM: PostgreSQL, Prisma, MongoDB, MongoDB Atlas, MySQL

Tools & DevOps: Git, GitHub, Docker, Postman, Vercel, Render, Cloudinary, Firebase Cloud Messaging (FCM), VS Code, Jest, Mocha, Vitest

Practices: Agile/Scrum, Code Review, Unit Testing, DSA

WORK EXPERIENCE

Software Development Intern - JetQuins (Remote)

Jul 2026 – Present

- Contributing to a production E-Sign platform, building backend and frontend features in a remote Agile team.
- Implemented real-time push notifications using Firebase Cloud Messaging (FCM), improving user engagement and delivery of time-sensitive document actions.
- Built a universal search feature that runs parallel queries across backend services, reducing search response time and improving relevancy across data sources.
- Designed and implemented a role-based user management and permissions system, controlling access across multiple user types.
- Wrote unit tests using Vitest to improve code reliability and catch regressions before deployment; created an 8-step interactive product tour guide to improve onboarding.
- Worked with TypeScript, Prisma ORM, and PostgreSQL to build type-safe, maintainable backend services.

Backend Developer - OnNextWeb (MERN Stack)

Dec 2025 – Apr 2026

- Built RESTful APIs using Node.js and Express.js serving 3+ user roles, handling authentication, user management, and core business workflows.
- Implemented JWT-based authentication and RBAC middleware, eliminating unauthorized API access across all protected endpoints.
- Optimized MongoDB queries and integrated Cloudinary for media storage, reducing average API response time by ~25% and achieving near-100% upload reliability.
- Shipped features iteratively in a 4-person Agile team on weekly release cycles.

Frontend Developer - Codefast Platform

Mar 2025 – Aug 2025

- Built a reusable React component library (cards, modals, forms, dashboards) that cut UI development time by ~30% across the product.
- Integrated React frontend with REST APIs, adding loading states, error boundaries, and user feedback for a smooth UX.
- Collaborated with backend engineers and designers to deliver full-stack features on weekly release schedules.

PROJECTS

Fast-AI - AI Mock Interview Platform - MERN, OpenAI/Groq API, JWT

Jan 2026 – Mar 2026

- Built and deployed a full-stack AI-powered interview platform with real-time LLM-generated questions, automated scoring, and feedback; live in production with 100+ test sessions.
- Designed secure JWT auth, modular REST APIs, and analytics dashboards with score trend and radar charts.
- Deployed on Vercel + Render + MongoDB Atlas with API response times under 300ms and a horizontally scalable architecture.

EDUCATION

B.Tech - Jamia Millia Islamia, New Delhi

sept 2022 – June 2026

CERTIFICATIONS

- The Complete Web Developer Bootcamp - Udemy | HTML, CSS, JavaScript, Node.js, React, MongoDB
- Data Structures and Algorithms - Coding Blocks | Java, Data Structures & Algorithms, Problem Solving
